PROJETS

Volunteer Gameplay Programmer

Star Tempest Studios — Remote | Jun 2025 – Present

- Volunteer work on independent 2D Platformer Project.
- Designed a **modular** inventory system using **Blueprint Actor Component**, **data structures**, and **enumerations**, allowing for variable properties.
- Architected a mount system with **3 types** of mounts, allowing the player to **board vehicles in-game**
- Constructed systems with **variables** that **other designers** could change for further iteration.

Gameplay Programmer - Capstone

Oathbound Studios — Remote | May 2025 – Present

- Program core gameplay systems in **C++** and **Blueprint** for Unreal Engine 5.
- Designed **multiplayer functionality**, communicating with **Steam** and across **server and clients** in-game.
- Designed robust **lobby system** allowing players to connect, invite their friends, and kick other players.
