

Karlo Sadural

Technical Designer / Junior Gameplay Programmer

Unreal Engine • Blueprint Scripting • Gameplay Systems

[Portfolio](#) | [GitHub](#)

Professional Summary

I am a Technical Designer with hands-on experience building gameplay systems in **Unreal Engine 5** using **Blueprints** and **C++**. I specialize in prototyping and implementing player-facing systems such as inventory, dialogue, skills, and animation logic, with a Blueprint-first workflow supported by C++ gameplay components.

Technical Skills

Programming & Scripting

- **Blueprint Visual Scripting** (Primary)
- **C++** (Gameplay Programming – Junior Level)

Gameplay & Systems

- Gameplay Systems Design (inventory, skills, dialogue, abilities)
 - Animation Blueprints & State Machines
-

Project Spearhead — *Gameplay Programmer / Multiplayer Engineer*

Unreal Engine 5.3 | Multiplayer RPG | Class Project | Team of 22

- Designed and implemented a **C++ Skills Component** to track and manage player abilities in a multiplayer RPG environment
 - Structured gameplay data using **custom C++ structs**, organizing skill-related variables for clarity and scalability
 - Exposed C++ systems to **Blueprints** via function libraries, enabling designers to trigger and manage skills in gameplay
 - Collaborated with designers, engineers, and artists to integrate gameplay systems within a large team production
-

Education

- **Bachelor of Science — Game Design and Development (In Progress)**
 - Purdue University
 - Expected Graduation: 2026
