PROFILE

Detail-oriented and collaborative technology professional pursuing a B.S. in Game Development at Purdue University. Experienced in software testing, debugging, cross-functional teamwork, and building user-focused systems in fast-paced development environments. Passionate about improving software usability, identifying issues before release, and creating reliable, polished experiences for end users. Strong communicator with leadership experience in customer-facing roles and a demonstrated ability to learn complex systems quickly.

TECHNICAL SKILLS

Languages and Technologies: C++, C, Lua, Unreal Engine 5 Blueprints, Unity, HTML/CSS

Software and Tools: GitHub, Visual Studio, JetBrains Rider, Jira, Trello, Diversion

Core Strengths: Software testing, bug identification and troubleshooting, QA workflows, usability-focused design, multiplayer systems, collaboration across teams, technical communication, problem solving

PROJECTS

Vicebound Kingdoms

June 2025 – Present

Oathbound Studios, Academic Capstone Project, Purdue University

West Lafayette, IN

- Built and tested a multiplayer lobby system supporting reliable online connectivity between players.
- Identified and resolved synchronization and replication issues affecting multiplayer gameplay stability.
- Developed modular interaction tools that improved workflow efficiency for designers and supported scalable feature testing.
- Created core player systems for health, abilities, and multiplayer replication while ensuring systems functioned consistently across networked sessions.
- Collaborated closely with developers and designers to troubleshoot bugs, refine gameplay usability, and improve overall player experience.

Untitled Platformer

June 2025 – Present

Star Tempest Studios, Volunteer Position

Remote

- Developed a modular dialogue system that enabled designers to efficiently implement and test narrative content.
- Implemented and validated vehicle gameplay systems, including hovercraft and snowboard functionality.
- Engineered save/load systems for persistent player progression and verified reliable data serialization behavior.
- Participated in iterative testing and debugging to improve software stability and user experience.

EXPERIENCE

Senior Game Advisor

West Lafayette, IN

GameStop

Nov. 2024 - Feb 2025

- Collaborated with coworkers to exceed sales quotas by 20 percent
- Reported to manager about performance weekly
- Resolved conflicts between coworkers and customers
- Recommended games to customers based on tastes
- Answered customer questions about video games, consoles, and accessories

EDUCATION

Purdue University

West Lafayette, IN

Bachelor of Science in Game Development

Aug. 2022 - May 2026

- CGT215, C++ Programming
- CGT385, Game Production
- CGT412, (Capstone) Senior Project Class
- CGT26505, Video Game Level, Mission, and World Design
